Home Network Checklist
Protect Yourself!

Working from home? Now that you're working remote, attackers have a new attack vector! Follow these simple steps to secure your home network from unwanted attention and traffic.

Action Items

- ❏ **Strong passwords for all accounts**
- ❏ **Do I have a leaked password? (haveibeenpwned.com)**
- ❏ **Google my name**
- ❏ **Change default passwords on all home network devices (router, smart tv, Alexa, etc.)**
- ❏ **Check my home network to see what devices are connected**
- ❏ **Enable network encryption**
- ❏ **All software is up to date**
- ❏ **Firewalls are active**
- ❏ **Disable remote access**
- ❏ **I have not allowed websites to remember my passwords**
- ❏ **I am using two-factor authentication**

Tips

- **Do not click on unknown links (even if you believe it is from a trusted source)**
- **Do not plug in unknown USB devices**
- **Do not post too personal of information on social media sites**
- **Use a VPN (virtual private network)**
- **Disconnect all digital helpers (ALEXA, SIRI, ETC)**
- **Do not give out your home network password to guests (create your own guest network)**
- **Turn home network off when not home**
